## Finding Real Plant Parts (in your home/neighborhood)

Please get your parents permission before picking any plant. Tape each part of the plant to its meaning below. Hint: What many people consider weeds (unwanted plants) still have all the 4 parts of a plant. (in class, we will look at your findings with a digital microscope)

### 1. flower

The flower makes seeds for the plant.

**glue/tape flower here**

### 2. stem

The stem supports the plant.  
It contains thin tubes for carrying  
food, minerals, and water.

**glue/tape stem here**

### 3. leaves

Leaves make food for the  
plant. They take in carbon  
dioxide and release oxygen into the air.

**glue/tape leaves here**

### 4. roots

The roots soak up water and  
minerals. They also store  
food for the plant.

**glue/tape roots here**

Could you label the flower below? There are four sections to label.  
(flower, leaves, roots, and stem)
